## PROVEN DEFENSE AGAINST ABOVE-GROUND YIELD ROBBERS

VT Double PRO<sup>®</sup> RIB Complete<sup>®</sup> corn blend products protect yield potential and grain quality with dual modes of action proven **effective against above-ground pests,** including European corn borer, fall armyworm, and corn earworm<sup>3,4</sup>.

# WHAT SETS VT DOUBLE PRO® RIB COMPLETE® CORN BLEND ABOVE THE REST:

- The first double-stacked corn trait with two ways to control above-ground insects
- Helps plants withstand herbicides, preventing weeds from competing for crucial nutrients and water
- Developed by the industry leader in trait technology and germplasm integration
- Plant-and-go convenience with no separate refuge required

#### **CUT DOWN ON WEEDS, NOT YIELD**

Roundup Ready<sup>®</sup> 2 Technology helps the corn plant withstand glyphosate herbicide applications. This helps to prevent susceptible weeds from robbing plants of the nutrients and water they need.

#### **EXCEPTIONAL ABOVE-GROUND PROTECTION**

Two individual modes of action give corn plants the above-ground protection they need against major pests that can inflict serious crop damage.

#### POWERFUL PROTECTION FROM PROBLEM PESTS:

EUROPEAN CORN BORER

CORN EARWORM

ALL ARMYWORM

Performance may vary from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.
