

CHOOSE THE MOST COMPLETE ABOVE-GROUND PEST PROTECTION FOR CLEANER EARS

Trecepta[®]
RIB COMPLETE[®] CORN

With broad spectrum control of above-ground pests, NEW Trecepta[®] technology can deliver maximum protection from insect damage.

WHY PLANT TRECEPTA TECHNOLOGY:

- **PROVEN PERFORMANCE**

Built on the proven performance of VT Double PRO[®] technology.

- **CLEANER EARS**

Promotes healthy stalks and cleaner ears that can help improve grain quality.

- **BROAD PEST SPECTRUM**

Broad spectrum control of above-ground pests, including Western bean cutworm, black cutworm, European corn borer, corn earworm and fall armyworm.

CUT DOWN ON WEEDS, NOT YIELD

Trecepta contains Roundup Ready[®] 2 Technology, which allows you to apply a Roundup[®] branded herbicide for effective weed control. By reducing weed pressure, plants have access to the nutrients and water they need.

EXCEPTIONAL ABOVE-GROUND PROTECTION

Trecepta technology reduces yield loss by protecting your corn crop from a wide range of pests. Different modes of action give you more complete control against above-ground insects that can inflict serious crop damage.

WESTERN BEAN CUTWORM

BLACK CUTWORM

EUROPEAN CORN BORER

CORN EARWORM

FALL ARMYWORM

MODES OF ACTION EQUAL CONTROL OF PEST * TRIPLE-MODE ACTIVITY ** DUAL-MODE ACTIVITY * SINGLE-MODE ACTIVITY**

¹ Pioneer claims suppression of corn earworm with Herculex I; Syngenta claims suppression of corn earworm with Bt11.

² Cry1A.105 and Cry2Ab2 from *B.t.* controls or suppresses corn earworm.

Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the Monsanto Technology/Stewardship Agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation to comply with the most recent stewardship requirements.

Performance may vary from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

Bayer is a member of Excellence Through Stewardship® (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. These products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from these products can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for these products.
