

THE SOYBEAN SYSTEM YOU CAN'T RESIST

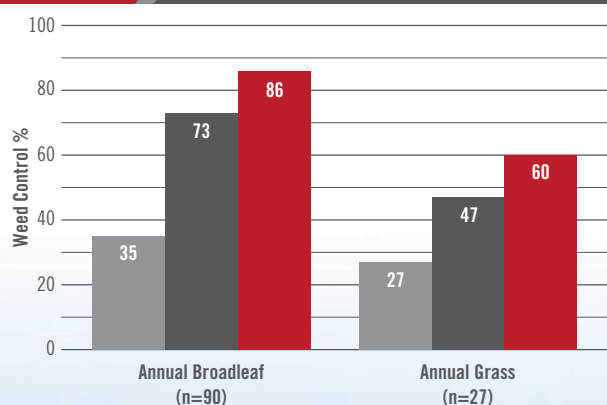

The Roundup Ready® Xtend Crop System combines the high yield potential of Roundup Ready 2 Xtend® soybeans with the option of two enhanced chemistries to control difficult and resistant broadleaf weeds.

Roundup Ready 2 Xtend soybeans are built on Roundup Ready 2 Yield® technology, which has been shown to produce more beans per pod and more bushels per acre vs. original Roundup Ready® soybeans.

Combining the high yield potential of Roundup Ready 2 Xtend soybeans with a built-in tolerance to both glyphosate and dicamba gives your crop a head-start against kochia¹ and other tough grass and broadleaf weeds. In fact, research trials showed a 2.4 bu./ac. increase² due to reduced early weed competition from the residual activity of dicamba.

CHART 1

Pre-Plant Residual Weed Control

WMAX (900 g ae/ha) PP

WMAX (900 g ae/ha) + D (300 g ae/ha) PP & WMAX (900 g ae/ha) PO-3

WMAX (900g ae/ha) + D (600 g ae/ha) PP & WMAX (900 g ae/ha) PO-3

WMAX = Roundup WeatherMAX®
D = dicamba

PP = preplant/pre-emerge
PO-3 = post emergent application at 3rd trifoliolate

CHART 2

Yield Impact of Early Residual Weed Control

WMAX (900 g ae/ha) PP & WMAX (900 g ae/ha) PO-3

WMAX (900 g ae/ha) + D (300 g ae/ha) PP & WMAX (900 g ae/ha) PO-3

WMAX (900 g ae/ha) + D (600 g ae/ha) PP & WMAX (900 g ae/ha) PO-3

WMAX = Roundup WeatherMAX
D = dicamba

PP = preplant/pre-emerge
PO-3 = post emergent application at 3rd trifoliolate

¹ Performance may vary from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the growers' fields.

Learn More at Traits.Bayer.ca

XtendiMax® and Roundup Xtend®, both with VaporGrip® Technology, are two chemistry options to help you enhance your yield potential:

1. **Roundup Xtend herbicide with VaporGrip Technology (Group 4 and 9):** is a pre-mix of our low-volatility dicamba formulation with Roundup®, for ease of use.
2. **XtendiMax herbicide with VaporGrip Technology (Group 4):** is a low-volatility dicamba formulation, which can be tank mixed with a Roundup-branded product.

For both these options listed above, applying the highest rate in the first herbicide pass provides short-term residual activity on small-seeded broadleaf weeds, including lamb's quarters, redroot pigweed and common ragweed, while helping to manage herbicide resistance concerns.

GLYPHOSATE-RESISTANT KOCHIA CONTROL COMPARISON

Roundup Xtend® herbicide with VaporGrip® Technology at 2 L/ac.

Source: 35 days after application in Carseland, AB 2019.

Enlist Duo™ at 1.72 L/ac.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready® 2 Technology contains genes that confer tolerance to glyphosate. Roundup Ready 2 Xtend® soybeans contains genes that confer tolerance to glyphosate and dicamba. Glyphosate will kill crops that are not tolerant to glyphosate. Dicamba will kill crops that are not tolerant to dicamba. Contact your local crop protection dealer or call the technical support line at 1-888-283-6847 for recommended Roundup Ready® Xtend Crop System weed control programs.
